

FMS-1655 Room Pressure Controller

Triatek's FMS-1655 Room Pressure Controller quickly and accurately controls airflow in hospitals and labs. It is ideal for clean rooms and isolation rooms, and is a vital part of preventing disease and infections.

Features:

- Triatek's innovative, patent-pending Safety Halo™ edge lighting allows busy nurses and medical professionals to quickly monitor multiple rooms with a simple glance
- Intuitive, full-color touchscreen with definitive action icons
- Ability to monitor 4 critical spaces with a single unit
- Simultaneous display of pressure, temperature, humidity, and air changes
- Automated clean mode for purging patient rooms of all airborne contaminants in preparation for next patient, expediting room turnover
- Capability to control the air change rate setpoint and enter it as a control target
- Audible and visual alarms
- BACnet and LonWorks compatible
- Available in flush mount or surface mount
