 Metasys Authorized Building Controls Specialists (ABCS)

Triatek® FMS-2000C & FMS-2000M Mounting Hardware Ordering Update

The FMS-2000C and FMS-2000M product families were originally sold with two kinds of mounting hardware, the Retrofit Ring for existing walls and the Rough-in Box for new construction. This led to unnecessary waste as you can only use one piece of hardware. It also made it difficult to order rough-in boxes ahead of the displays for new construction. As of December 7, 2020 the mounting hardware is sold separately. You can order the specific mounting hardware you need and schedule the delivery for when you need it.
